Consumer Portal

The Consumer Portal includes functions for managing your Sybase® Money Mobiliser account. For example, you can manage your accounts (also known as wallet) with multiple sources of payment instruments such as bank accounts, credit cards, a stored value account (SVA), and Offline SVAs. Additionally, you can pay bills, send money to family or friends, and add airtime top-up. Whether you are paying your electric bill or sending money to a friend, Money Mobiliser can help you.

Note: The portal feature descriptions and illustrations pertain to the out-of-the-box version of Money Mobiliser.

Signing Up for a Consumer Account

The Consumer Signup page lets you to create one of two types of consumer accounts: money or mBanking.

Prerequisites

A valid mobile phone number, postal address, and e-mail address.

Note: A bank account is not required to use Money Mobiliser.

Task

1. From the Mobiliser Login page, click **Consumer Signup**.
2. Choose one of the consumer types:
 - Money — is a mobile wallet used for financial transactions such as sending money, paying bills, and adding airtime top up.
 - mBanking — is a mobile wallet with the same features as the Money account, but also lets you monitor payments and transfers using the mobile browser and smart client channels.
3. Enter all required information.
The default time zone is Europe/Berlin.

Note: If you call customer support, you must know your security question.

4. Enter the CAPTCHA characters.
5. Accept the terms and conditions, then click **Continue**.
6. Accept the terms of the license agreement, then click **Next**.
7. Review your information and click **Continue**.
A one-time passcode (OTP) is sent to your mobile phone.

Note: Depending on your Do Not Disturb (DND) settings and geographic location you might not receive the OPT on your mobile phone.

8. Enter the OTP.

Note: If you do not receive the OTP, click **Resend**.

9. Click **Continue** to finalize your registration.
10. Click **Continue** again to return to the Mobiliser Login page.

Logging in to the Consumer Portal

Prerequisites

A registered Money Mobiliser user name, which is case sensitive.

Task

1. Enter your user name and password.

Note: If you forget your password, click **Forgot Password** and submit the required information. A temporary password is sent to your registered e-mail address. After you log in using the temporary password, you are prompted to change it immediately.

2. Click **Login**.

Self Care

The Self Care option provides self-service functions for managing your personal information, such as your security question and answer, password, PIN, address, contact points, mobile alerts, and preferences. You can also manage a friends list, which lets you send money or top up airtime to the people on that list.

Friends List

The Friends List lets you add, edit, and remove other Money Mobiliser users, to whom you can send money or airtime top up, either online or from your phone. For example, you can pay back a friend or give weekly allowances. Once you set up your friends list, you can send money or airtime top up immediately from your primary payment instrument to primary payment instrument of anyone on the list.

Note: You can add only registered users to the Friends List.

The screenshot shows the SYBASE 365 Mobile Services Consumer Portal. The user is logged in as Jane Doe (500040501). The page title is 'Consumer Portal' and the balance is EUR135.00. The navigation menu includes 'SELF CARE', 'MANAGE ACCOUNTS', 'TRANSACTIONS', and 'BILL PAYMENT'. The 'Friends List' page is active, showing a table with one friend, Han Solo, and a 'Remove From List' button.

Remove From List

© 2013 SAP AG or an SAP affiliate company. All rights reserved. | Contact Support | About Mobiliser | Session Timeout: 9:45 Minutes

Preferences

The Preferences option lets Money Mobiliser consumers to change whether they prefer e-mail messages, SMS, or both, for marketing notifications. You can also turn off marketing notifications. In addition, you can specify your time zone.

Contact Points

The Contact Points option lets you add, edit, or remove contact points, and send test messages to any contact point. When you set up mobile alerts, you must choose one or more contact points.

You can have only one primary contact point, which is the registered mobile phone number of your Money Mobiliser account. You cannot modify or remove the primary contact point; however, you can register more than one mobile device, fax, or e-mail address for the same account, or across multiple accounts. Therefore, joint account users can customize alerts and other features for their devices.

The screenshot shows the 'Consumer Portal' for Sybase 365 Mobile Services. The user is logged in as 'Han Solo (500012753)'. The 'SELF CARE' menu is active, and the 'Contact Points' option is selected. The interface displays two sections: 'Primary Contact Point' and 'Other Contact Points'. The primary contact point is a mobile number (+9705551234). The other contact points include an email address (qqjinn@live.com) and a mobile number (13036210898), both with associated actions like 'Edit', 'Remove', and 'Send Test Message'.

Number/Address	Type	Actions
+9705551234	Mobile	Send Test Message

Number/Address	Nickname	Type	Actions
qqjinn@live.com	Colleague	Email	Edit Remove Send Test Message
13036210898	Friend	Mobile	Edit Remove Send Test Message

Mobile Alerts

The Mobile Alerts option lets you add alerts from a predefined list, or manage existing alerts. For example, you can receive daily or weekly balance alerts when a balance falls below the defined threshold for a payment instrument. You can also create multiple alerts for a particular payment instrument. Additionally, you can define quiet periods (also known as Do Not Disturb) within a calendar period, or disable messaging for specific days of the week, for example, weekends.

Note: Mobile alerts are for bank accounts only.

Adding Mobile Alerts

You can add mobile alerts for a particular payment instrument.

Prerequisites

A registered Money Mobiliser user name.

Task

1. Click **SELFCARE**.
2. In the left pane, click **Mobile Alerts**.
3. Click **Add an Alert**.
4. In the Actions column, click **Add** for the alert you want to add.
5. Choose the account for the alert.
6. Select one or more contact points.
7. Click **Save**.

Adding a Date/Time Schedule

You can add, edit, or remove Do Not Disturb settings for an existing alert.

Prerequisites

At least one mobile alert.

Task

1. Click **SELFCARE**.
2. In the left pane, click **Mobile Alerts**.
3. In the Actions column, click **Edit** for the alert to which you want to add a date/time schedule.

Self Care

4. Enter the required information.
5. Select the time and days for the Do Not Disturb Settings.
6. Click **Add**.
7. Click **Save**.

Manage Accounts

The Manage Accounts option provides a wallet, which you can use to set up different electronic payment instruments such as multiple bank accounts and credit cards. A bank account or credit card is not needed to use Money Mobiliser. When your Money Mobiliser account is created, a stored value account (SVA) is set up automatically and is set as your primary payment instrument. However, you can select either a bank account or credit card as your primary payment instrument. Any payment instrument in your wallet can be used for paying bills, but your primary payment instrument is used for person-to-person payments.

If you do not have a bank account or credit card, funds can be added to your account:

- If another user sends you money using the Send Money or Friends List features.
- Through a pickup code.
- By depositing cash into the account (cash-in) at a distribution center.

If you have a bank account or credit card, you can:

- Add funds from either one.
- Withdraw funds from your SVA and transfer them to your bank account.

Payment instruments can be deactivated by a customer support agent. When a payment instrument is inactive, it appears in the list of accounts but you are not able to edit the information. You can only remove the inactive payment instrument from your list of accounts.

Bank Accounts

The Bank Accounts option lets you add one or more bank accounts to your wallet. You can then optionally choose that account as your primary payment instrument. You can edit a bank account in your wallet, or remove one.

You can set up mobile alerts for each bank account in your wallet to notify you of its balance summary, transaction summary, or threshold summary. You can also make your bank account available for mobile transactions.

Note: You cannot view your bank account balance in the Money Mobiliser portal.

Credit Cards

Use the Credit Cards option to add one or more credit cards to your wallet. You can add and remove credit card information only; only a customer service representative can make changes to your credit card information.

Stored Value Account

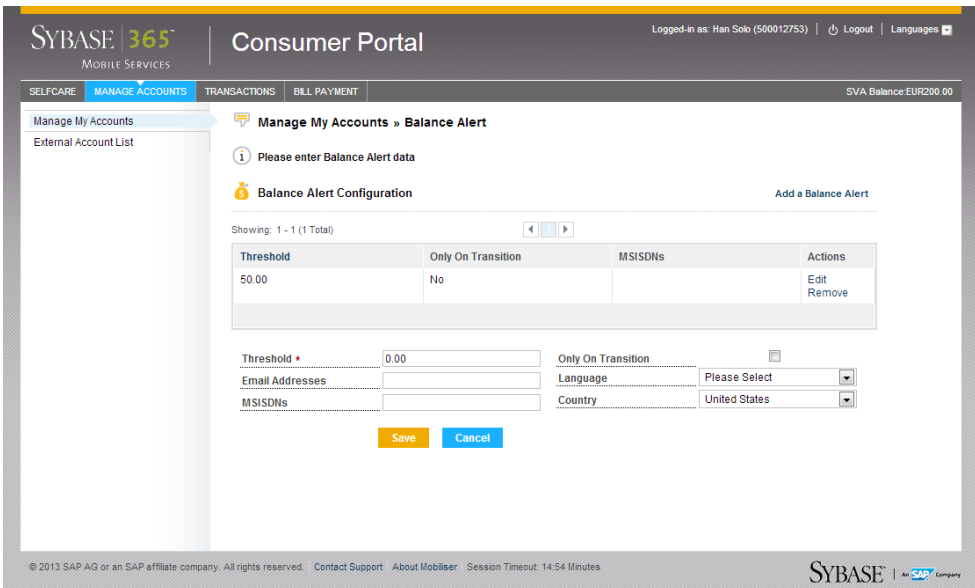

Use the Stored Value Account option to add funds to your SVA from a bank account or a credit card in your wallet. Additionally, you can transfer funds from your SVA to a bank account in your wallet.

Note: When you sign up to use Money Mobiliser, you are provided with only one SVA.

The SVA is set, by default, as the primary payment instrument, and the balance starts at zero. The balance of your SVA appears in the upper right of the navigation bar, and in View Transactions under the Transaction menu.

You can set up balance alerts to be notified when a balance falls below the defined threshold. You can have a balance alert sent to an e-mail address, a mobile phone number, or both. If you select Only Transition, you receive an alert only the first time the threshold is reached. If you do not select Only Transition, you receive an alert each time you make a transaction and your balance is below the threshold.

Offline Stored Value Accounts

Offline stored value accounts are similar to SVAs, but stored directly on the mobile phone. You can perform the usual operations, such as adding and withdrawing funds, and viewing the current balance and transaction history. Unlike a regular SVA, you can have more than one offline SVA.

Note: By default, your offline SVA serves as the global fall-back account for merchants who own SVAs.

External Accounts

Use the External Accounts option to add a payment instrument to your wallet that you can use to send money to a third-party bank account that you do not own. You can send money from your primary payment instrument to any third-party account holders, whether or not they are signed up with Money Mobiliser.

External accounts are similar to the bank accounts and credit cards in your wallet, because you can use external accounts to pay bills. However, you cannot add money to your SVA from an external account, or transfer money from your SVA to an external account. You can edit and remove an external account from your wallet.

The screenshot shows the SYBASE 365 Consumer Portal interface. The user is logged in as Han Solo (50012753). The page title is 'Consumer Portal' and the SVA Balance is EUR200.00. The navigation menu includes SELF CARE, MANAGE ACCOUNTS (selected), TRANSACTIONS, and BILL PAYMENT. The main content area is titled 'External Bank Accounts' and shows a table with one account listed:

Select	Nickname	Account No.	Bank Code	Account Holder	Actions
<input type="checkbox"/>	External1	xxxxxxx0024		Jane Doe	Edit Send Money

Below the table is a 'Remove Accounts' button. The page footer includes copyright information for 2013 SAP AG and the SYBASE logo.

Manage Accounts

Transactions

The Transactions option lets you view all your transactions, send money or airtime top up amounts to another Money Mobiliser user, send money to a bank, and request money from another Money Mobiliser user.

View Transactions

The View Transactions screen displays all airtime top up, bill payment, and SVA transactions. The SVA balance appears in View Transactions any time money is transferred in or out of the SVA. Additionally, you can view all money transfers that are requested and sent between other Money Mobiliser users. To view your transactions, you must search by month or a specified date range.

Note: You can also view airtime top-up, request money, and bill pay transactions in the Bill History search results.

The screenshot shows the SYBASE 365 Consumer Portal interface. The user is logged in as Han Solo (500012753). The page title is 'Consumer Portal' and the SVA Balance is EUR200.00. The navigation menu includes SELF CARE, MANAGE ACCOUNTS, TRANSACTIONS (selected), and BILL PAYMENT. The left sidebar lists options: View Transactions, Send Money, Send Money to Bank, Send Money to Bank, Request Money, and Airtime Topup. The main content area is titled 'View Transactions' and features a search filter for 'Month' set to 'May-2013'. Below the filter is a 'Search' button. The results show 'Showing: 1 - 1 (1 Total)'. A table displays the transaction details:

Date	Type	Participant	Details	Amount	Actions
5/17/13 5:37:50 PM	Add Funds to SVA	Han Solo	Allowance	200.00EUR	Details

At the bottom of the page, there is a copyright notice: © 2013 SAP AG or an SAP affiliate company. All rights reserved. Contact Support | About Mobiliser | Session Timeout: 14:55 Minutes. The SYBASE logo and SAP Company logo are also present.

Send Money

Use the Send Money option to instantly transfer money to another Money Mobiliser user's primary payment instrument. This is similar to the Send Money feature in your Friends List;

Transactions

however, with a Send Money transaction, you must enter the recipient's mobile phone number.

You can also send money to unregistered users. When you send money to an unregistered user, a pickup code is sent to them via a short message service. The unregistered user can then visit an agent location, and receive the money by providing the pickup code and mobile phone number. At the time of pickup, the unregistered user is given the option to register as a Money Mobiliser consumer.

Send Money to a Bank

Use the Send Money to a Bank option to send money from your primary payment instrument to a registered third-party bank account that is not set up as an external account. To send money to a bank, you must know the account number, bank code of the account holder, and the account holder's name.

Request Money

Use the Request Money option to request money from other Money Mobiliser users. When you request money from another Money Mobiliser user, the funds are taken from his or her primary payment instrument. For example, if a bank account is set up as his or her primary payment instrument, the funds are sent from that bank account. The Money Mobiliser user being asked to send money must manually send the money using the Open Bills feature. For example, if user A is requesting money from user B, then user B must pay user A via Open Bills.

The screenshot shows the SYBASE 365 Mobile Services Consumer Portal. The user is logged in as Han Solo (50012753). The page title is 'Consumer Portal'. The navigation menu includes SELF CARE, MANAGE ACCOUNTS, TRANSACTIONS (selected), and BILL PAYMENT. The current balance is SVA Balance: EUR200.00.

The 'Request Money' form is displayed. It includes a sidebar with options: View Transactions, Send Money, Send Money to Bank, Request Money (selected), and Airtime Topup. The form instructions state: 'Please enter the Payer Mobile Phone Number and the amount you would like to request'. The form fields are: Payer's Mobile Phone Number (text input), Amount (text input with a red asterisk and 'EUR' label), and Message (text area with a red asterisk and '(max. 80)' label). There are 'Continue' and 'Back' buttons at the bottom of the form.

© 2013 SAP AG or an SAP affiliate company. All rights reserved. | Contact Support | About Mobiliser | Session Timeout: 14:55 Minutes | SYBASE | SAP Company

Airtime Topup

Use the Airtime Topup option to add airtime minutes to your mobile phone or to the phone of another user. Purchase airtime minutes using your primary payment instrument. You can see all airtime top-up transactions in the View Transactions and Bill History search results.

To add airtime minutes, select the invoice type (Operator) and enter the amount. If you are adding airtime minutes to the phone of another user, enter that user's mobile phone number. If you do not enter a mobile phone number, then you are adding airtime minutes to your own mobile phone.

Transactions

Bill Payment

Bill payments in the Money Mobiliser are implemented with invoice types, bill configuration, and bills. The invoice type is configured by the invoice issuer (biller) for type of bill. The bill configuration contains consumer-specific configurations for an invoice type, creating a personalized reference to an invoice type. The actual bills belonging to a bill configuration contain at least the amount due and a reference number that is provided by the biller to the customer.

Bill Configuration

The Bill Configuration option lists your current bill configurations, which are linked to an invoice type that stores default configuration data for the bills. The bill configuration contains at least one reference number, provided by the invoice issuer, which identifies the customer's account, for example, your account number at the electricity company.

To make payments on demand, add a bill configuration using the available invoice types. You can also edit or remove a bill configuration. An invoice issuer can create multiple bills, for example, if one issuer provides bill payment for electricity and water, but the customer pays separately for each service.

The screenshot shows the SYBASE 365 Consumer Portal interface. The user is logged in as Jane Doe (500012751). The main navigation menu includes SELF CARE, MANAGE ACCOUNTS, TRANSACTIONS, and BILL PAYMENT. The current page is titled 'Bill Configuration' and shows a table of configurations. The table has columns for Select, Name, Type, Reference, and Actions. There are two rows: 'Electric' with reference 9876543 and 'Water' with reference 1234567. Both rows have an 'Edit' action. A 'Remove From List' button is located below the table. The page also includes a sidebar with 'Bill Configuration', 'Open Bills', 'Pay Bill', and 'Bill History' options.

Select	Name	Type	Reference	Actions
<input type="checkbox"/>	Electric	SybaseElectricity	9876543	Edit
<input type="checkbox"/>	Water	SapWater	1234567	Edit

Remove From List

Open Bills

The Open Bills option displays all active bills from the issuer, or money that is being requested by another Money Mobiliser user. You can pay open bills with any of the payment instruments in your wallet. When paying an open bill, choose the payment instrument you want to use to pay the bill. After paying an open bill, it no longer appears in the list. You can also cancel an open bill at any time. Paid bills show up under Bill History.

The screenshot shows the SYBASE 365 Consumer Portal interface. The top navigation bar includes 'SELF CARE', 'MANAGE ACCOUNTS', 'TRANSACTIONS', and 'BILL PAYMENT'. The user is logged in as 'Han Sob (500040500)'. The 'Open Bills' section is active, showing a table with the following data:

Date	Type	Reference	Bill Ref.	Name	Amount	Actions
07/09/2013	payment demand for 500040501		Services rendered	Demand for Payment	50.00 EUR	Pay Cancel

Pay Bill

The Pay Bill option displays the bills that are set up under Bill Configuration. You can pay any of the bills immediately, but you cannot set up future payments or edit a payment. To pay a bill, you must enter the bill reference defined on the paper invoice, enter an amount for which you are paying, and select the payment instrument. The payment is immediately taken from your primary payment instrument.

Note: The issuer assigns the bill reference for the customer account, which is different for each bill.

The screenshot shows the Sybase 365 Mobile Services Consumer Portal. The user is logged in as Han Sob (500011602) and has an SVA Balance of EUR125.00. The navigation menu includes SELF CARE, MANAGE ACCOUNTS, TRANSACTIONS, and BILL PAYMENT. The main content area is titled 'Pay Bill' and shows a table with one entry:

Name	Type	Reference	Actions
SybaseElectricity	SybaseElectricity	936714001	Make Payment

The page also includes a footer with copyright information: © 2013 SAP AG or an SAP affiliate company. All rights reserved. Contact Support | About Mobilizer | Session Timeout: 14:18 Minutes. The Sybase logo and 'An SAP Company' are also present.

Bill History

The Bill History displays all bill payment, airtime top-up transactions, and non-real-time money requests. Each bill you have paid appears in Bill History, as well as in the View Transaction search results. You can search for bills by month, date range, type, or status. All search parameters are optional. However, if you are searching by type or status, the results display all bills with that parameter.
