# Product Summary

This release bulletin provides information about SAP® Open Server™ 16.0.

SAP Open Server version 16.0 is compatible with these operating system configurations.

- Microsoft Windows x86 32-bit
- Microsoft Windows x86-64 64-bit

For the most current list of supported operating systems, see the platform certifications page at <http://certification.sybase.com/ucr/search.do>. For a list of platforms, compilers, and third-party products SAP Open Server is built and tested on, see the *New Features Bulletin SAP Open Server 16.0 and SDK for SAP ASE 16.0 for Windows, Linux, and UNIX*.

## Product Components

---

For a list of SAP Open Server components and the platforms on which these components are supported, see the *New Features Bulletin SAP Open Server 16.0 and SDK for SAP ASE 16.0 for Windows, Linux, and UNIX*.

For Windows, SAP has tested and certified the following compilers and linkers for use with SAP Open Server:

- Microsoft Visual Studio 2005 32-bit and 64-bit C/C++ Compiler, version 14.00.50727.762.
- Microsoft Visual Studio 2005 32-bit and 64-bit Executable Linker, version 8.00.50727.762.

## IPv6 Support

---

SAP Open Server supports IPv6 for platforms.

As of this release, SAP Open Server on Microsoft Windows platforms supports IPv6. Below is a `sql.ini` file entry where the last two server addresses are in IPv6 numeric format:

```
[BARNARD_OS]
master=tcp,barnards.sybase.com,18200
query=tcp,barnards.sybase.com,18200
master=tcp,barnards.v6.sybase.com,18200
query=tcp,barnards.v6.sybase.com,18200
master=tcp,fd77:55d:59d9:165:203:baff:fe68:aa12,18200
query=tcp,fd77:55d:59d9:165:203:baff:fe68:aa12,18200
```

## Sample Files

You can find sample files in the SAP Open Server installation directory %SYBASE%\%SYBASE\_OCS%\sample.

## Availability with 64-bit Libraries

Use the -DSYB\_LL64 flag to compile applications that use the 64-bit libraries.

## Compatibility and Interoperability Matrix

Compatibility and interoperability matrix shows the compatibility and interoperability matrix of SAP Open Server, SDK for SAP® ASE, SAP® Adaptive Server® Enterprise (SAP® ASE), and SAP® Replication Server® across versions.

For specific platform information, refer to the respective product certification reports.

Although two or more products can be interoperable, remember that new features introduced in a newer version of a product may not be supported with older versions of the same or other products.

SAP Open Server	SDK for SAP ASE			SAP ASE			SAP Replication Server						
<b>16.0</b>	1 6. 0	1 5. 5	1 5. 0	1 6. 0	1 5. 5	1 5. 0. x	1 2. 5. x	1 5. 7	1 5. 5	1 5. 2	1 5. 1	1 5. 0. 1	1 2. 6
Microsoft Windows x86 32-bit	x	xx	x	x	xx	x	x	x	x	x	x	x	x
Microsoft Windows x86-64 64-bit	x	xx	x	x	xx	x	n/ a	x	x	n/ a	n/ a	n/ a	n/ a
LEGEND: x = compatible; n/a = product not available or does not work with SAP Open Server on that platform.													

**Note:** The SDK for SAP ASE and SAP Open Server compatibility information shown in Compatibility and Interoperability matrix is relevant only if the compatible products are installed in different %SYBASE% directories.

*Additional considerations*

- For SAP Open Server and SDK for SAP ASE to be compatible, header files included in an application must be the same version level as the library with which the application is linked.
- Bulk-Library routines cannot be used in applications that call SAP Open Server.
- SAP Open Server applications that are based on DB-Library™ are not supported in version 11.x or later.

**See also**

- *Running Different Versions of SAP Open Server on Microsoft Windows* on page 6

**Guidelines for Installing SAP Open Server with Other SAP Products**

Guidelines for installing SAP Open Server on the same server with other SAP products.

- Use `.bat` files to ensure that each product is started with the correct SAP Open Server version and environment variables.
- SAP recommends that you do not mix versions of SDK for SAP ASE and SAP Open Server in the same directory. For example, do not install SDK for SAP ASE 16.0 in a directory containing Open Server 15.5—in this case, upgrade both SDK for SAP ASE and SAP Open Server to 16.0.

## Product Summary

# Special Installation and Configuration Instructions

Instructions for SAP Open Server installation and configuration.

See the *SDK for SAP ASE and SAP Open Server Installation Guide* for your platform for instructions about installing SAP Open Server.

---

**Warning!** If you install both SAP Open Server and SDK for SAP ASE in the same directory, SAP recommends that you use the same version and ESD levels. Because SAP Open Server and SDK for SAP ASE share files, using different version and ESD levels can cause product failures.

---

For instructions on configuring your environment, see the *Open Client and Open Server Configuration Guide* for your platform.

For information on compiling and executing SAP® Open Client™ and SAP Open Server applications, including the sample programs, see the *Open Client and Open Server Programmers Supplement* for your platform.

## See also

- *Guidelines for Installing SAP Open Server with Other SAP Products* on page 3

## Installing EBFs

---

To ensure that your installation is the most current, SAP recommends that, after installing SAP Open Server, you download and install the corresponding latest available EBF.

1. Download product updates from Downloads at <http://downloads.sybase.com>.
2. To verify that you are using the correct version of SAP Open Server, check the version string of the SAP Open Server library:

```
find "Sybase" %SYBASE%\OCS-16_0\dll\libsybsrv.dll
```

Each SAP Open Server release includes a subset of the SDK for SAP ASE. Thus, SAP Open Server EBFs contain two separate version strings: one for the SAP Open Server EBF, and one for the SDK for SAP ASE files such as Client-Library, **isql**, and **bcp**.

For example, in an SAP Open Server product, the Server-Library version string might be `Server-Library/16.0/P-EBF17391-17390`, and the Client-Library string might be `Client-Library/16.0/P-EBF17930`. In these version strings, 17931 identifies the SAP Open Server EBF, and 17930 identifies the Client-Library file as well as other SDK for SAP ASE files.

## Running InstallAnywhere and InstallShield Multiplatform Installers

---

Some of the files generated by InstallAnywhere and InstallShield Multiplatform share the same file names.

This becomes an issue when you use both InstallAnywhere and InstallShield technologies to install or uninstall products in the same installation directory, because files that are used by both installers are overwritten or removed without warning. SAP recommends that you do not use InstallShield and InstallAnywhere to install to or uninstall from the same installation directory.

## Running Different Versions of SAP Open Server on Microsoft Windows

---

In a heterogeneous environment that uses applications built for different versions of SAP Open Server, you must explicitly set a path for each version at the command prompt.

In this example, applications using the 12.5.x products are installed in the `d:\ocs-1251` directory and applications using the 16.0 products are installed in the `d:\ocs-16_0` directory:

1. To use Open Server 12.5.x, open a Command Prompt window and set the SYBASE and OCS-16\_0 environment variables to the 12.5.x directory. For example:

```
set SYBASE=D:\ocs-1251
set OCS-16_0=OCS-12_5
```

2. In the same Command Prompt window, set the PATH environment variable. For example:

- On Microsoft Windows x86 32-bit:

```
set PATH=%SYBASE%\%OCS-16_0%\bin;%SYBASE%\%OCS-16_0%\dll;
%SYBASE%\%OCS-16_0%\lib3p;%PATH%
```

- On Microsoft Windows x86-64 64-bit:

```
set PATH=%SYBASE%\%OCS-16_0%\bin;%SYBASE%\%OCS-16_0%\dll;
%SYBASE%\%OCS-16_0%\lib3p64;%SYBASE%\%OCS-16_0%\lib3p;%PATH%
```

3. To use SAP Open Server 16.0, open another Command Prompt window and set the SYBASE and OCS-16\_0 environment variables to the 16.0 directory. For example:

```
set SYBASE=D:\ocs-16_0
set OCS-16_0=OCS-16_0
```

4. In the same Command Prompt window, set the PATH environment variable. For example:
  - On Microsoft Windows x86 32-bit:

## Special Installation and Configuration Instructions

```
set PATH=%SYBASE%\%OCS-16_0%\bin;%SYBASE%\%OCS-16_0%\dll;  
%SYBASE%\%OCS-16_0%\lib3p;%PATH%
```

- On Microsoft Windows x86-64 64-bit:

```
set PATH=%SYBASE%\%OCS-16_0%\bin;%SYBASE%\%OCS-16_0%\dll;  
%SYBASE%\%OCS-16_0%\lib3p64;%SYBASE%\%OCS-16_0%\lib3p;%PATH%
```

Although you must install different versions in separate directories, you can maintain a single `sql.ini` file by passing the address file name explicitly to each application, for example:

```
isql -P -Usa -Sconnect50 -ID:\ocs-16_0\ini\sql.ini
```

## Changed Functionality in this Version

Changed functionality for SAP Open Server is described in *New Features Bulletin SAP Open Server 16.0 and SDK for SAP ASE 16.0 for Windows, Linux, and UNIX*.

## Changed Functionality in this Version

## Known Issues

Review known issues and workarounds, listed by Change Request (CR) number.

**Note:** If you have a Sybase® support contract, you can search the Sybase Web site for solved cases. Choose **Support > Solved Cases** or go to <http://search.sybase.com/search/simple.do?mode=sc>. You need a MySybase account to view solved cases in the archive.

If you have an SAP® support contract, use the Sybase xSearch to search for knowledge-based articles and solved cases. Go to the SAP Sybase Support Portal at <http://service.sap.com/sybase/support>, log in, and select **KBAs & Solved cases** to start the xSearch.

Key to issue types:

- **RTC** – SAP® Release to Customer tracking number.
- **CSN** – SAP Customer Services Network tracking number.
- **CR** – Sybase® Change Request number.
- **AG** – Agentry® tracking number.
- **N/A** – No tracking number.

CR#	Description
555455	<p><b>SAP Open Server requires components of Microsoft Visual C++ libraries.</b></p> <p><b>Workaround:</b>To use SAP Open Server on Microsoft Windows, download and install the Microsoft Visual C++ 2005 Service Pack 1 Redistributable Package:</p> <ul style="list-style-type: none"> <li>• Download the <i>package for Microsoft Windows x86 32-bit</i>.</li> <li>• Download the <i>package for Microsoft Windows x86-64 64-bit</i>.</li> </ul>

## Installer Issues

Known issues and workarounds, if any, that you might encounter when installing SAP Open Server.

**Table 1. Installer Issues**

CR#	Description
595614	<p><b>On Microsoft Windows 2008, the installer can create the SAP Open Server installation directory only when you are logged in as an administrator, even if your role has permission to create directories.</b></p> <p><b>Workaround:</b> Manually create the installation directory before running the installer.</p>

## Known Issues

CR#	Description
590282	<p><b>You cannot use the Tab and arrow keys on the keyboard to navigate the Choose Product Features window of the installation or uninstallation program.</b></p> <p><b>Workaround:</b> Use the mouse to click the Choose Product Features window. This sets the focus on the window and you will be able to use your keyboard.</p>
588179	<p><b>When installing in console mode, some western characters display incorrectly.</b></p> <p><b>Workaround:</b> Before you install SAP Open Server:</p> <ol style="list-style-type: none"><li>1. Open a Command Prompt window.</li><li>2. Run <b>chcp 1252</b> to change the code page to 1252.</li><li>3. Right-click the Command Prompt window title and select <b>Properties</b>. In the <b>Font</b> tab, select <b>Lucida Console</b> and click <b>Ok</b>.</li><li>4. Use the same Command Prompt window to run the installer in console mode.</li></ol>
583979	<p><b>The installer does not validate feature names specified in the response file when you install in silent mode.</b></p> <p><b>Workaround:</b> Ensure that the specified feature names are correct.</p>

## Programming Issues

---

Known programming issues and workarounds, if any, relevant to SAP Open Server.

**Table 2. Programming Issues**

CR#	Description
	<p><b>Upgrading to a new version</b></p> <p><b>Workaround:</b></p> <p>For dynamically linked SAP Open Server applications (<b>svlib</b>), SAP recommends that you recompile and relink using the SDK libraries that now include “syb” in the library names.</p> <hr/> <p><b>Note:</b> If you have made any changes to the application files, you must recompile.</p> <hr/> <p>Ensure that the runtime libraries are for the same major release as the version used to build the application.</p>
	<p><b>System path restriction</b></p> <p><b>Workaround:</b> Do not create a system path larger than 1K.</p>

CR#	Description
	<p data-bbox="329 215 763 243"><b>SAP Open Server Routines not Supported</b></p> <p data-bbox="329 258 1184 430"><b>Workaround:</b> Certain Open Server routines are not supported on Windows platforms. Although you can use <b>srv_capability</b> to determine whether a routine is supported, the SAP Open Server DLL does not provide stub points to resolve link-time dependencies. If a portable application uses any of the following SAP Open Server routines, make sure that it calls <b>srv_capability</b> to determine the availability of the routine and to provide a Windows-specific stub module for linking:</p> <ul data-bbox="329 453 517 609" style="list-style-type: none"><li data-bbox="329 453 450 477">• <b>srv_poll</b></li><li data-bbox="329 486 473 510">• <b>srv_select</b></li><li data-bbox="329 519 473 543">• <b>srv_signal</b></li><li data-bbox="329 552 478 576">• <b>srv_sigvec</b></li><li data-bbox="329 585 517 609">• <b>srv_dbg_stack</b></li></ul>

## Known Issues

# Documentation Changes

Updates, corrections, and clarifications to the documentation released with SAP Open Server 16.0.

## Batched Parameters Samples

See *Support for batched parameters* under 15.7 *New Features for ESD #4* in the *New Features Bulletin SAP Open Server and SDK for SAP ASE 16.0 for Windows, Linux, and UNIX*.

## resultlen Parameter Description for cs\_convert Routine

Correction to *resultlen* parameter description for **cs\_convert** routine in the *Open Client and Open Server Common Libraries Reference Manual*.

The reference manual incorrectly documents that **cs\_convert()** sets *\*resultlen* to CS\_UNUSED when **cs\_convert()** fails; **cs\_convert()** does not set *\*resultlen* to CS\_UNUSED upon failure.

Consider the return value of **cs\_convert()** rather than the value of *\*resultlen* to check if the routine has succeeded.

# Obtaining Help and Additional Information

Use the Product Documentation site and online help to learn more about this product release.

- Product Documentation at <http://sybooks.sybase.com/> – online documentation that you can access using a standard Web browser. You can browse documents online, or download them as PDFs. The Web site also has links to other resources, such as white papers, community forums, maintenance releases, and support content.
- Online help in the product, if available.

To read or print PDF documents, you need Adobe Acrobat Reader, which is available as a free download from the *Adobe* Web site.

---

**Note:** A more recent release bulletin, with critical product or document information added after the product release, may be available from the Product Documentation Web site.

---

## Technical Support

---

Get support for SAP® products.

If your organization has purchased a support contract for this product, then one or more of your colleagues is designated as an authorized support contact. If you have any questions, or if you need assistance during the installation process, ask a designated person to contact Technical Support as specified in your contract:

- Sybase Technical Support or the Sybase subsidiary in your area
- SAP Technical Support

Customers with an SAP support contract can obtain support for this product at the SAP support site, <http://service.sap.com/sybase/support>. You can also find information about Sybase support migration at this location (login may be required).

Customers with a Sybase support contract can obtain support for this product at <http://www.sybase.com/support> (login required).

## Downloading Product Updates

---

Get maintenance releases, support packages and patches, and related information.

- If you purchased the product directly from Sybase or from an authorized Sybase reseller:
  - a) Go to <http://www.sybase.com/support>.
  - b) Select **Support > EBFs/Maintenance**.

## Obtaining Help and Additional Information

- c) If prompted, enter your MySybase user name and password.
- d) (Optional) Select a filter, a time frame, or both, and click **Go**.
- e) Select a product.

Padlock icons indicate that you do not have download authorization for certain EBF/Maintenance releases because you are not registered as an authorized support contact. If you have not registered, but have valid information provided by your Sybase representative or through your support contract, click **My Account** to add the “Technical Support Contact” role to your MySybase profile.

- f) Click the **Info** icon to display the EBF/Maintenance report, or click the product description to download the software.
- If you ordered your product under an SAP contract:
  - a) Go to <http://service.sap.com/swdc> and log in if prompted.
  - b) Select **Search for Software Downloads** and enter the name of your product. Click **Search**.

## Product and Component Certifications

---

Certification reports verify Sybase product performance on a particular platform.

To find the latest information about certifications:

- For partner product certifications, go to [http://www.sybase.com/detail\\_list?id=9784](http://www.sybase.com/detail_list?id=9784)
- For platform certifications, go to <http://certification.sybase.com/ucr/search.do>

## Accessibility Features

---

Accessibility ensures access to electronic information for all users, including those with disabilities.

Documentation for this product is available in an HTML version that is designed for accessibility.

Vision impaired users can navigate through the online document with an adaptive technology such as a screen reader, or view it with a screen enlarger.

HTML documentation has been tested for compliance with accessibility requirements of Section 508 of the U.S Rehabilitation Act. Documents that comply with Section 508 generally also meet non-U.S. accessibility guidelines, such as the World Wide Web Consortium (W3C) guidelines for Web sites.

---

**Note:** You may need to configure your accessibility tool for optimal use. Some screen readers pronounce text based on its case; for example, they pronounce ALL UPPERCASE TEXT as initials, and MixedCase Text as words. You might find it helpful to configure your tool to announce syntax conventions. Consult the documentation for your tool.

---

For information about how Sybase supports accessibility, see the Sybase Accessibility site: <http://www.sybase.com/products/accessibility>. The site includes links to information about Section 508 and W3C standards.

You may find additional information about accessibility features in the product documentation.

## Obtaining Help and Additional Information
